MURCHIE INSTALLATION OF AIR COMPRESSOR IS NEARING COMPLETION

Some time during this week the new Worthington air compressor that was purchased by the Murchie mine people, will be completely installed and ready for use.

This new compressor is of mamoth proportions and has a capacity pumping power of 2300 cubic feet of free air per minute. Installation is in charge of Mr. Kaufmann of the Worthington Manufacturing Co. Kaufmann's home is in New York. He is being helped in the work by employees of the Murchie mine.

It took two cars of the Nevada County Narrow Gauge Railroad Company to transport the air compressor into this city. It was received here about two weeks ago.

Upon using this new compressor, it will enable the Murchie mine to put into use a number of more drilling machines.

TOOLS STOLEN FROM SILVER PICK PEOPLE

Thursday night some hoodlums stole some working tools from the Silver Pick Conoslidated Mines Incorporated. They were taken from near the company's properties east of Nevada City about four miles on Deer Creek.

Several men are working on the pole line near the mines under the supervision of Phil Folck of Grass Valley. Upon starting to work Friday morning, Folck and his men found that the saws and axes that they had been using for the work were gone. Someone had evidently waited until the men had gone home Thursday night and then sneaked the tools away.

If a few o fthose kind of sneak thieves were left hanging by the neck near a road in full view, the percentage of robberies in the hills would be greatly lessened.

BIG OAK MINE LEASE CANCELLED

According to Joe Werry who with his brother, two sisters and the Russell heirs, own the Big Oak Tree mine adjoining the property of the Rising Sun mine, a mile west of Colfax, the lease of their mine to E. C. Clinker and the Paramount Mines Corporation has recently been canceled.

The property had been leased to Klinker and his various companies for a period of time. The owners, according to Werry, have been approached by a group of mining men who desire to take the property over and work it.

The Big Oak Tree mine is as famous as the old Rising Sun mine, which adjoins it and itts history dates back to the early 80's when it was operated by the late Joseph Werry and S. D. Valentine of San Francisco.

Samples of ore from the Big Oak assayed to the value of $2,085.42 a ton in June, 1931, when the mine was being operated by the Paramount Company.

The Big Oak has never been developed very extensively and old time mining men state that it is one of the best mining properties in the state, and the equal of the Rising Sun property which adjoins and which to date has yielded more than $2,500,000 in gold ore.—Colfax Record.

WILD ANIMAL SHOW NOW GOING IN GRASS VALLEY

Bringing his troupe of wild animals up from Los Angeles, Al Roberts has opened a wild animal show in Grass Valley on Main street. In his educational exhibition, Roberts claims to have the only performing wild cats in the entire world. He has three of them and it is said that they do almost everything he tells them .

The show opens this afternoon and will probably be here for about a month. Adults are charged 15 cents while children pay 10 cents for admission fee. Both afternoon and evening exhibitions will be given.

Other animals int he show include monkeys, mountain lions, cubs, freak roosters and others.

Mrs. F. T. Nilan has returned from a visit of three weeks with her daughter, Mrs. Geo. Hampton, of San Francisco.

TRUCKEE EDITOR ASKS PROBE OF CO. PRINTING

Stanley Bavier, editor and proprietor of the Truckee Republican, is fighting mad and is demanding an investigation as to why the Grass Valley Union is getting practically all of the county printing.

The editor of the Republican in the issue of October 27th, has the following:

The Attorney General of the State of California has been asked to investigate why the Board of Supervisors of Nevada Countp have not advocated for bids for county printing and advertising for the past 20 years, and why discrimination and favorism has been shown by the board, and why the board refuses to give any printing to the Truckee Republican printing establishment.

R. N. McCormack, county clerk, Nevada County, and clerk of the Board of Supervisors admits that the Board of Supervisors have not advertised for printing bids for the past twenty years. And he further refuses to state when bids will be advertised in the future.

Complaint has also been filed with the Attorney General against the county tax collector—who refuses to answer just why he is giving all the delinquent tax list to the Grass Valley Union, thus showing discrimination.

The county printing has been a mystery in the county for a number of years. All sorts of rumors have been current as to why favorism has been shown and ample opportunity will be made to the Board of Supervisors to explain the truth of these rumors.

According to the Preliminary County Budget for Nevada County for the Fiscal Year Ending June 30, 1932, the Board of Supervisors were allowed $400 for advertising and printnig; the county clerk was allowed $500 for stationery; the Treasurer and Tax Collector were allowed $750 for advertising and printing and $250 for stationery; the Assessor was allowed $400 for stationery; the county Sheriff was allowed $225 for stationery and supplies; the Recorder was allowed $11 for stationery and $5,000 was allowed for the Primary election and an additional $2,000 was allowed for miscellaneous advertising.

And in the Preliminary Budget for the Fiscal Year, Ending June 30, 1933, a similar amount was allowed for stationery and printing and advertising with the addition of $1,-310 for printing ballots for the elections; $1,000 for election advertising; $95 for election envelopes; $155 for election forms and $85 for election supplies.

Despite the fact that the Truckee Republican is one of the leading newspapers in the county, and has been active in the development of Truckee, the only town of any size in the county, located on the transcontinental, Victory highway, and the main line of the Southern Pacific railroad; not one cent have the county officials paid to the Truckee Republican for county printing, and it did not get any of the delinquent tax list advertising.

A sweeping investigation as to where all the thousands of dollars of the taxpayers money for county printing is going to, has been started.

REVEREND BUCKNER MAKES A VISIT

Rev. H. H. Buckner, of the local M. E. Church made a trip over the county last Tuesday. He was accompanied by Doctor H. K. Hamilton, of Sacramento. They visited North San Juan, Camptonville, and Sierra City, where they held services and were well recieved.

At North San Juan, the ladies of the church had prepared a delicious dinner which was dully disposed of and was greatly appreciated by all who had the good fortune to be present.

Miner Passed At County Hospital

Louis Pastaris, a native of Italy passed away at the county hospital, Tuesday, October 25th, at 11 p. m. The remains were taken to Holmes Funeral Home and the funeral was held yesterday, the interment taking place at the Pine Grove Cemetery.

Mr. Pastaris had lived in California for about 16 years, was a member of Grass Valley Lodge I. O. O. F. which order officiated at the ceremony yesterday, and as far as known leaves no relatives in this part of the country.

Assassin[illegible] Striker

Nordahl Peterson, 25-year-old Canby, Minn., farmer and farm strike picket, became the first casualty in the farm price war waged in midwestern states when he was fatally wounded by a shotgun blast fired at him and companion pickets from an auto which immediately sped away. Peterson is shown above with his sister.

SPRING HILL MINE TO CONTRACT WORK SOON

Since the early part of July, the Spring Hill Gold Mines Incorporated have been doing development work on their mine just north of the Idaho Maryland mine and the Golden Gate mine. Work has progressed until now the company is ready to let out work by contract. They are now receiving bids for the sinking of shafts.

The company is a San Francisco syndicate made up of a closed group of mining men. H. R. Plate is their manager here. He is living in Grass Valley where he has been since the work was started early in July. Plate has Clarence J. Harry in the capacity of mine superintendent. The Spring Hill Gold Mines Incorporated is a thoroughly financed organization. There is no stock for sale in the company.

The Spring Hill mine has been owned by the Lukenan Investment Company for the past sixty years. The Spring Hill Gold Mines Incorporated have obtained the mine from them on an option.

The mine has not been worked since 1869, at which time the work was abandoned at the 220 foot level. That work was done on what is known as the Nathan shaft. From there, Mr. Plate states, they will drift to an indefinite depth, depending on the vein. It is probable that they will sink at least 1000 or 2000 feet beyond the now lowest level.

The Pacific Gas and Electric Co. is puttnig in a power line extension to the property. That work will be completed in about a week. In several days from now Mr. Plate is expecting the electrical equipment from San Francisco. When all this electrical work is completed, which will be about the 15th of November, the contracted sinking work will be started.

NEVADA COUNTY WILL ENTERTAIN GOV. ROLPH

Wednesday evening, Gov. James Rolph of California and his party are scheduled to visit Nevada City between 5 and 6 o'clock. A reception is being planned the merchants and mining men of this city have been asked to assist in the reception.

At 6:15 later in the evening, a dinner is being given at the Bret Harte Inn, Grass Valley, with Governor Rolph a guest of honor. The public is invited and the dinner charge will be $1.00 per plate. After dinner the Governor will address the assembly. A big 'gathering from Nevada City is expected to journey down to Grass Valley with the chief executive.

Charles E. Clinch of Grass Valley is in line to be appointed by Governor Rolph to the post of Californita State Highway Commissioner in a few days. It is hoped that the Governor's impression of Clinch's home county will be good.

WORK OF CONDENSER

The purpose of a condenser in the car's eletcrical system is to prevent high-tension current from fouling the breaker points, according to the Free Emergency Road Service of the California State Automobile Association. A tendency toward dirty breaker points is a sign that the condenser is not working properly and should be replaced.

AGED GRASS VALLEY PASSES IN OAKLAND

A one time well known resident of Grass Valley, Edward J. (Ned) Rodda, died in Oakland last Wednesday evening. The deceased was born in England 87 years ago and came to California in 1858 Being a mining man, he settled in Nevada County and for over 20 years lived in Grass Valley. Twenty five years ago he retired and went to Oakland to live with relatives. During that time he lived for the most part with James Rodda, his nephew and Mrs. Winifred Smith, his neice, both former residents of Grass Valley and Nevada City.

Ned Rodda was never married. He is survived by two sisters, Mary Ann and Thomasine, and a brother William, all of whom live in England. The two sisters are nearly one hundred year old

In recent years, Ned Rodda has been preceded in death by four brothers, Samuel, John, James and Thomas, all were at one time residents of this country.

The body was cremated in Oakland last Saturday and the remains are being brought to Grass Valley for burial.

LOCAL MAN TRADES HIS GRAHAM FOR STUDEBAKER

Two weeks ago, Clyde Mugford got in Sacramento what he though was a good buy in automobiles. He bought a 6 cylinder Graham sedan, and for a few days thought his automobile troubles were over. Then it came to light that the new car had a cracked cylinder block. Mugford's spirits were dashed to several different kinds of pieces and the prices people payed in Nevada City for pork chops that week were something awful.

So the following Sunday, Mugford rode with Louis Riley to Sacramento and tried to get satisfaction from the automobile company that sold him the car. "Nothing doing," was the answer he got. And that was that. The official of the automobile company told him however, to bring the car back some time and they would see what kind of a "trade in" they would give him on another car.

Yesterday Mugford took the car down to Sacrameno and looked around for another car. Finally he saw a snappy looking Studebaker 8 Dictator sedan. Exactly what Mugford wanted, but he knew the price would be too high. Just then the salesman walked by and Mugford buttonholed him. Upon questioning it was learned that the Studebaker was just within reach with the Graham thrown in.

"Sold!" cried our hero, and another big financial deal went down into history.

Mugford can now be seen driving his great big eight cylinder chariot around the streets of Nevada City, unless he finds that it too has got a cracked cylinder block.

REPLACING SHACKLE BOLTS

When replacing spring shackle bolts care should be taken not to get them too tight, according to the Free Emergency Road Service of the California State Automobile Association. If the bolts are too tight they will cause the car to ride harder and there is also the chance of breaking a spring leaf.

Grass Valley Resident Confesses Setting Fires

FULL DIESEL ENGINES NOW IN PURITY TRUCKS

The Purity stores are fast converting all of their heavy duty trucks to diesel power. Of late, all of the Purity trucks coming into Nevada City have been diesel driven.

The one that makes the trip most often is the only four cylinder diesel truck that has been built by the Cummings Diesel Engine Company. This truck is driven by Berne Shermantine, an experienced truck driver, who claims that there is no comparison betwen the gasoline and diesel engines for truck use. The added horse power and speed combined with the unbelievably low operating costs, makes the use of diesel power in all trucks imperative in the near future.

These Cummings engines are in reality, conversion jobs, and are installed in White trucks. There are so many orders now on hand that the Cummings people areunable to keep up the with the demand. Their work i sto take out the old gasoline enine in the trucks and to install the new type full diesel engine.

The four cylinder engine driven by Shermantine has a 4½ inch bore and a 6¼ inch stroke. At 1800 revolutions per minute, the four cylinders develop 83 horse power. In a test run of 742 miles, Shermantine found the cost of his fuel for the distance to be just $1.95. This can be more readily believed when it is explained that diesel fuel oil sells around the bay district in the neighborhood of 3 cents per gallon. Less diesel fuel oil is used than gasoline for the same horse power engine. The lubricating oil consumption is also less than that o fgasoline engines.

The four cylinder diesel that makes the Nevada City run gets between 11 and 13 miles per gallon of fuel oil. The same truck, when using the standard gasoline engine made but an average of 3 to 5 miles per gallon of gasoline.

Diesel engines are fast replacing steam, gasoline, distilate and electric power plants. It will not be long before we will all be driving diesel power under the hoods of our automobiles.

CARRIE MINE GETS 80 ACRE PROPERTY

An area containing 80 acres of ground immediately adjacent to the Empress mine has been taken under lease by the Carrie Mines Corporation. This acquisition, however, is not interfering with development of the company's property near Pine Grove, Amador county ,where the shaft has been sunk below the 100 foot level with deeper working opening a three foot vein estimated to run about $50 across the entire width, with six inches of exceptional high-grade reported.

OCTOBER REPORT OF NARROW GAUGE SHOWS INCREASE

The October report of the Nevada County Narrow Gauge on tonnage and carloadings shows a healthy increase. This is in keeping with the general increase in practically every railway system in the United States and goes to show that merchants are building up depleted stocks in the expectation of better business days. In the report just published by the local rail station it shows that 886 tons of carload freight was hauled into Nevada City by rail in October. This weight was made up of the following items: 6481 gallons kerosene, 7,000 gallons road oil and asphalt, 6,500 gallons fuel oil, 230 tons road rock and gravel, 8,-000 pounds feed and flour, 45,367 gallons gasoline, 1060 bundles shingles, 39 tons lump coal, 40,000 feet mining timbers, two broad gauge cars of mining machinery, and 47,-192 board feet of finished lumber.

Red Cross chapters and the national relief organiation working jointly during the past year handled the cases of more than 400,000 ex-service men and their families. Your membership helps carry on this welfare work.

Albert Markham Confesses to Starting Fires on Alta Hill October 3.

CONFESSES TO OFFICERS

State Investigator and Local Officer Obtain Confession After Tracing Clues

After working on the case for nearly a month, Horace Kennedy, State Investigator for the Division of Forestry at Sacramento and W. F. Sharp, State Ranger in charge of Nevada County succeeded in obtaining a complete confession from the man who set the 19 fires on Alta Hill October the third.

The man, Albert Markham of Grass Valley ,in his confession stated that he was tired and disgusted. He said that just before setting the fires he was angry because his wife chided him for always being out of a job. A fight with his wife he stated, was the reason that he set the fires to the hill and to their cabin.

It was a Monday afternoon when he set the fires and at 2:45 the call for help sent from Banner Mountain lookout to the Nevada City State Ranger office. The men from Chief Ranger Sharp's office responded and found that 19 fires had been set in a 20 acre tract on Alta Hill, just north of Grass Valley. It took fourteen rangers but two hours to put the fires under control and only an acre and one half of brush and timber were burned.

Working on several meager clues, Kennedy and Sharp had by this afternoon obtained enough information to be able to confront Markham with. After vainly trying to establish an alibi, the guilty man confessed to the starting of the 19 fires on the hill and one to his cabin.

It seems that in a fit of anger he told several men that he was going home and burn his wife out. He then walked out to his home on Alta Hill and set the 19 fires on the hill and one in his home. If the local rangers had not been so efficient, great damage may have been done by Markham's rash action.

After obtaining sufficient information, Kennedy and Sharp this afternoon arrested Markham in Grass Valley and brought him before Justice Winburn of Grass Valley. He made a complete confession there and waived a preliminary examination. He is now being held over to the superior court on $5,000.00 bail.

Evidence against Markham i svery good and he is charged under number 447 A of the penal code, to wit, "Arsen a Felony."

Kennedy and Sharp swore out the complaint and warrant for the arrest before District Attorney W. E. Wright this morning in Wright's Nevada City offices.

BUILDING ACTIVITIES HERE AND THERE

T. W. Reynolds, has just completed a new roof job for Johnson, the nursery man and Mr. Johnson is now high and dry for the coming winter months.

John Bertison, contractor from the lower country, is starting remodeling on one of the houses belonging to M. Angilolini, on Boulder street. The other job is just about completed, as soon as the painter gets through touching up the high spots.

New construction work for the Relief Hill Mining Company was brought to a conclusion the past week. Two new "rockers" were built by T. W. Reynolds of Nevada City. This mine is located in the North Bloomfield section.

The Malone Development Company, at North Bloomfield, are doing a lot of new construction work. New flumes are being figured and other plans will soon be realized. Nevada County Lumber Company, is furnishing material for thise work.

The old Floy Property, which was recently purchased by Mrs. Carr, and has been in the process of improvement is about ready for her son, R. E. Carr and family to move into.

WHAT ABOUT COUNTY PRINTING?

In another column will be found a news story regarding an investigation into the matter of county printing.

The publishers of the Nugget are newcomers in Nevada county, and we are not in a position right now, to make any charges of favoritism or anything of that sort regarding the manner in which printing contracts are handled by Nevada county officials. We print the Truckee story simply as a matter of news.

If the laws which require advertising for bids in certain cases are not being complied with, then it is well that this matter be called to the attention of the proper authorities.

The editor of the Nugget has lived in counties where certain newspapers were favored in the matter of county printing and, of course, this caused bitter newspaper controversies. We don't like that kind of journalism and it is not our desire to be drawn into any such controversy, but—if and when we come to the conclusion that illegal or unfair practices obtain in Nevada county in the matter of buying county printing—we will have more to say on this subject. For the present we will wait until we have more information

PLAIN TALK

In recent address, Fred H. Sexauer, President of the Dairymen's League Cooperative Association, of New York, said some plain words concerning the plight of the farmer.

He pointed out that a leading cause of depression was the failure of farm prices to keep pace with the rising pricer of the products of urban workers which they bought and that no permanent recovery can be expected until farm prices reach reasonable and profitable levels.

Prosperity on the farm means prosperity for every other business, and more money in the pockets of every worker. To day, according to Mr. Sexauer, there are three or four million rural homes that are prospective markets for bathroom fixtures, kitchen appliances, electric lights and labor saving devices and similar commodities. People who live in those homes want to buy—concerns that make the articles want to sell. But they can't sell because the people have no money. Farmers have almost ceased to exist so far as being a market for the products of shop and factory is concerned.

Every progressive American, everyone interested in the nation's welfare, is behind the farmer in his fight. Many believe the solution to be mainly in organization—the banding together of farmers in strong cooperatives that have the size, the financing and the power. The fact that the cooperative movement is making progress in the face of determined and often unfair opposition by those who are against it for selfish reasons, is good reason for "betting" on our agricultural future.

Turn on the Current

Do you believe in electricity? Do you believe in its power to make the street car run? If you do, we can in a few moments talk, convince you of the power of vital force, or human electricity, in the body. Man does not run the street car. He simply turns on the current. Man cannot run your physical being, but he can turn on the human electrical current—that's what the competent chiropractor does.

If you don't believe in this human electrical current of nervous energy, then how do you account for the fact that the paralytic cannot raise the paralyzed arm? Why is he paralyzed? What is lacking, except the human electrical current or mental impulse? The proof of this lies in the fact that these patients come to us and, without the use of drugs or instruments, massage or vibrator, but with only the two hands, we adjust the vertebrae of the spine, removing the pressure from the nerves, thus releasing this current so that it can flow freely to the paralyzed arm and the patient gets well. This is equally true of every organ in your body.

Health follows Chiropractic Vertebral adjustments. All we ask is a chance to prove our claim that our adjustments will restore health in most cases where other methods have afforded no relief.

Mining Deal Just Completed May Mean Great Deal to Nevada City

Mr. J. E. Bevis, president of the Red Hill Florence Mining Company, a Nevada Corporation, was in Nevada City for several days last week negotiating for a mining property for his company to operate. Mr Bevis has been active in a great many mining enterprises in Nevada, both in Tonopah and Goldfield, for a great many years past, and his company, the Red Hill Florence Mining Company, still retains valuable holdings adjoining the Goldfield Consolidated Mines at Goldfield, Nevada.

Friday Mr. Bevis consummated a deal whereby he acquired the Valerio Garesio Ranch including the Aetna Quartz claim, patented, as well as several other mining claims adjacent thereto, a total of over 150 acres on which there are several veins, the most important of which is the Aetna vein. This property is situated about four miles westerly from Nevada City, and is conivently located for mining operations, being situated right on the Downieville highway, with both electric power and water available and close at hand.

Pleased with the remarkably fine surface showing on the Aetna vein and convinced that the excellent ore shoot exposed on the surface by nature and recent work will persist at depth, Mr. Bevis indicated that the Red Hill Florence Mining Company intends starting active development work soon and will sink a shaft to properly explore and develop the vein.

Early in the summer, Frank E. Clark, of Nevada City, and Lewis R. Robins, for a number of years superintendent at the Belmont mine at Tonopah, obtained a lease with option to purchase the Garesio Ranch and at that time also acquired some adjacent mining claims. They were very much impressed with the size and strength of the two main veins that strike northwesterly and southeasterly across the Garesio property for a length along the two more or less parallel veins of approximately 2,500 feet. They commenced a systematic geological study of the property, and by cross cutting, trenching, prospecting and assaying the various outcrops which were exposed and which they exposed, it was found that exceptionally good values existed along the Aetna vein for a considerable distance, and these values taken with the size of the vein indicatd an unusually strong ore-shoot.

Of the two strong well defined veins on the property, the Aetna, or footwall vein, is the stronger, better mineralized, with the better vein structure and far better values on the surface.

Samples carefully taken and checked along the main ore-shoot, practically on the surface, gave vaiues of $17.67 for 26 inches, $12 for 24 inches, $21 for 28 inches on the hanging wall where the total width of vein was four feet, $95 for ten inch hanging wall band of heavily mineralized ore where the width of the vein was four feet, and $237 per ton for a ten inch hanging wall ban dof quartz near the $95 sample with total width of quartz three feet. Close to the last mentioned samples the vein is six feet wide. In a shallow shaft 500 feet easterly from the ore-shoot the Aetna vein shows values of $2.80 across 18 inches of good looking quartz. Even a thousand feet westerly from the ore-shoot there are exposrues of the vein 30 inches to three feet wide with values sufficiently high to warrant considerable exploration work.

The two approximately parallel veins are close enough together, especially near the main ore-shoot on the Aetna, so that they both can be easily developed from a main working shaft.

In view of the fact that the two veins outcropped so strongly and that by a comparatively small amount of work exceptional values were shown to exist in the main ore-shoot on the Aetna vein, Messrs Clark and Robins consider it quite remarkable that the Caresio property has lain untouched for such a long interval since it was mined superficially in the 80's.

Mr. Robins maintains that the surface showing of the Garesio property is far better than anything else he has seen in the district and claims that the Aetna has great possibilities for making a good mine at depth.

Lindgren indicated that the Aetna vein belonged to the same vein system as the Ural vein, one of the two most important veins of the Champion-Providence Group, and from the Champion-Providence Group there has been a production conservatively estimated at at least $8,000,000 and ranging upwards according to other authorities as high as $20,000,000. When the Champion-Providence Group was being mined, the Ural vein showed a very rich shoot of ore in the Providence mine, continuing northerly it was extensively mined on the Champion ground, as well as in the Nevada City mine to the north. Turning more westerly at the Nevada City mine the Ural vein strikes approximately north 70 degrees west through the Chapman Ranch and Coan mine. The Ural vein if projected westerly o nthe same strike that it has through the Chapman Ranch and to the Coan shaft would be practically in the same position that the Aetna vein does occupy. and in as much as the Aetna vein is the strongest fissure in the vicinity of the Garesio property it is in all probability the westward continuation o fthe Ural vein. This is at least, the belief and contention of some geologists who are qualified to express themselves on the subject by reason of their knowledge of the district.

Until very recently the Empress mine was a similar property to the Aetna with only a fairly good surface showing and without any continuity o foutcrops as exist on the Aetna property. And those who have seen the Empress underground workings know that they have a truly remarkable showing underground.

Regardless of its relationship to the Champion-Providence Group, and even though it were completely isolated from any mine of merit and known production, the Aetna vein ore-shoot would justify extensive development work, especially in view of the fact that it is practically virgin ground, having been mined by shallow workings only, in a crude way since the 80's. While the production is not definitely known it has been reported as about $15,000 most of which was taken from a 250 foot drift probably not more than 70 feet below the surface, and from ore that milled from $12 to $14 per ton at the old Murchie mill.

The concentrates ran from $128 to $1,000 per ton and the vein averaged from two to two and one half feet along the 250 foot drift, but in some places therein was from three and one half to four feet wide.

Mr. Clark and Mr. Robins are much pleased to think that they have been able to interest outside capital in the Caresio property, and have been assured that ample funds will be available for the proper development of the Aetna vein.

The property was inspected by a number of local geologists and mining engineers and they too were surprised at the extraordinarily fine surface showing. Several mining engineers of national standing wanted the opportunity of submitting the Garesio property to their companies or clients in the event Mr. Bevis did not exercise his option.

Mr. Bevis, when he left for San Francisco, Friday to secure the necessary machinery and equipment for the mining operations, expressed himself as being more than pleased with the Garesio property because of its obviously good showing and the fact that it is practically virgin ground with wonderful opportunity to make a real mine of it.

ALLEGHANY

ALLEGHANY, Oct. 29.—W. D. Cook, of Sacramento, who represents the Minnesota Woolen Mills, was here for a few days calling on his customers.

The high school students who attend the branch high school in Forest, attended a party which was given for the entire class by their teacher, Mrs. June Johnson at her home in Forest. Everyone had a very enjoyable evening.

Freddy Develey, who attends the Christian Brothers high school in Sacramento, is home visiting his parents and sister over the week-end.

Most people in our little town have been having severe colds which seem to be going around.

Mrs. Weegie and Mrs. Pearl Eddy motored to Grass Valley one day this week.

Looks like we will have some rain soon, and it will be very welcome.

Mr| Waldron took his departure for the lower country recently.

Most of the new homes that have been built, are about completed, and certainly give an added attraction to our mountain town.

SCIENTIFIC MOTOR EX-RAY TUNE-UP $3.00

Including—
1 Adjust Ignition, check timing.
2 Clean and adjust contact points.
3 Check Valves for sticking or B urnt conditions.
4 Test Ignition Coil under compression.
5 Adjust Generator charging rate.
6 Test each individual Cylinder for compression and rings.
7 Clean motor and generator commutator.
8 Check all wiring for open and short circuits.
9 Clean and adjust spark plugs.
10 Check Carburetor.
11 Test Ammeter and Ignition Switch.
12 Fill Battery and clean terminal.

DO YOU WANT
YOUR TAXES
INCREASED?

DO NOT BE MISLED!

Amendment No. 9 would cause the imposition of

A new State Income Tax on what you earn;
A new selective State Sales Tax on what you buy;
A new State Ad Valorem Tax on what you own.

Dr. David Prescott Barrows, Professor of Political Science, former President of the University of California has this to say about Amendment No. 9:

"This initiative measure proposes to transfer a further proportion of school support from the counties to the state. Its announced purpose is also to reduce local taxes on real estate and personal property. The latter object may be desirable, but there is reason to believe that this initiative measure would leave our tax system—and ultimately our land tax burden—in a worse situation than we have already. The measure *increases the cost* of education and compels the state to find the additional money. * * * *Proposition No. 9 should be voted down.*"

TAXES ARE TOO HIGH NOW

Coleman
ELECTRIC COFFEE MAKERS

Coffee that is always mellow, rich and satisfying is easy to make in the Coleman Coffee Maker. Brews it the "no-boil" way, retaining all the fragrance and flavor.

The Colonial model is beautiful in design. Finished in special process, extra durable nickel plate. Six or 9 cup sizes. Ebonized handle. Has extra large heating element. The non-spill spout is a feature you'll like. Extra quality cord and plug. This attractive coffee maker is an ideal gift for any occasion.

MOTORISTS SHOULD BE SURE AND READ SIGNS

Automobile collisions at intersections last year cost the lives of 8,590 persons and injured countless others, and were responsible for a total of 390,200 accidents.

Pedestrians are also frequent violators of intersection crossing rules, according to the records. Twenty-two per cent of all pedestrian accidental deaths, or 3,170, and 99,800 injuries were accounted for at intersections.

It is the driver who sees a favorable signal light some distance off, and then accelerates his speed in an attempt to pass the intersection before the signal changes, who is a dangerous driver. The speed of his car makes it difficult for him to stop if he reaches the intersection after the light changes. Then his chances for causing an accident are immeasurable.

The Modern Municipal Traffic Ordinance drafted by the National Conference on Street and Highway Safety gives expert advice on the problem. It says:

"Whenever traffic at an intersection is controlled by traffic control signals exhibiting colored lights or the words "go," "caution," and "stop," said lights and terms shall indicate as follows:

"Green or 'go'—Traffic facing the signal may proceed, except that vehicular traffic shall yield the right of way to pedestrians and vehicles lawfully within a crosswalk or the intersection at the time such signal was exhibited.

NOTICE OF APPLICATION TO APPROPRIATE WATER

Applications 7024 & 7113

NOTICE IS HEREBY GIVEN, That Edward Bickel, P. O. Box 881, Nevada City, California, has applied to the Division of Water Resources, Department of Public Works, State of California, for permits to appropriate unappropriated water, subject to existing rights.

Description of Project Application 7024

Date Filed: July 31, 1931.

Water to be Appropriated from: Greenhorn Creek, tributary to Bear River.

County of: Nevada

Amount applied for: 38 cubic foot per second.

Diversion season named: January 1st to December 31st of each season.

Water to be used for: Mining & Domestic purposes.

Point of Diversion within: NE¼ of NW¼ of Sec. 10, T. 16 N., R. 10 E., M. D. B. & M.

Place of Use described: Sailor Flat mine of Fenton Gold Mining Corp., within Sections 4, 5 & 8, T. 16 N., R. 10 E., M. D. B. & M., as shown on map filed with the Division of Water Resources.

Water will be returned to Greenhorn Creek within NW¼ of NE¼ of Sec. 8, T. 16 N., R. 10 E., M. D. B. & M.

Application 7113

Date Filed: November 2, 1931.

Water to be appropriated from: Little Greenhorn Creek (sometimes called Spanish Ravine) tributary to Greenhorn Creek, thence Bear river.

County of Nevada

Amount applied for: 15 cubic feet per second.

Diversion season named: January 1st to December 31st of each season.

Water to be used for: Mining & domestic purposes.

Point of Diversion within: NW¼ of NE¼ of Sec. 4, T. 16 N., R. 10 E., M. D. B. & M.

Place of use described: Sailor Flat Mine of Fenton Gold Mining Corp., within Sections 4, 5 & 8, T. 16 N., R. 10 E., M. D. B. & M., as shown on map filed with the Division of Water Resources.

Water will be returned to: Greenhorn Creek within NW¼ of NE¼ of Sec. 8, T. 16 N., R. 10 E., M. D. B. & M.

Relative to Protests

Blanks upon which to submit protests will be supplied free upon request by the Division of Water Resources.

Any person desiring to protest against the granting of such permits shall within 60 days from date hereof, file with the Division of Water Resources, Sacramento, California, a written protest. Such protest shall clearly set forth the protestant's objections to the granting of the applications and shall contain the following information:

(1) Statement of the injury which would result to protestant from such appropriation and use.

(2) The basis of protestant's water right.

(3) Protestant's past and present use of water both as to amount used and land irrigated, or use made of water if other than irrigation.

(4) The approximate location of such land or place of use and of the point of diversion of the water.

A copy of the protest should be sent to the applicant and this office notified that the same has been done.

LEGAL NOTICE

SUMMONS

In the Superior Court of the State of California in and for the County of Nevada.
No. 6085

Action brought in the Superior Court of the State of California, in and for the County of Nevada, and complaint filed in the office of the Clerk of said County of Nevada.

Corporation of America, a corporation,
Plaintiff,
vs.
Augustus Stenger, Margaret H. Dickerman, Thomas W. Richards, M. Rosenberg, also known as Morris Rosenberg, and Rose Rosenberg, his wife, John Doe, Richard Roe, Black Company, a corporation, and also all other persons unknown claiming any right, title and estate, lien or interest in the real property described in the complaint adverse to plaintiff's ownership, or any cloud upon plaintiff's title thereto,
Defendants.

The People of the State of California Send Greetings To:

Augustus Stenger, Margaret H. Dickerman, Thomas W. Richards, M. Rosenberg, also known as Morris Rosenberg, and Rose Rosenberg, his wife, John Doe, Richard Roe, Black Company, a corporation, and also all other persons unknown claiming any right, title and estate, lien or interest in the real property described in the complaint adverse to plaintiff's ownership, or any cloud upon plaintiff's tite thereto.
Defendants.

YOU, AND EACH OF YOU, are hereby directed to appear and answer the complaint in an action entitled as above, brought against you in the Superior Court of the State of California, in and for the County of Nevada, within ten (10) days after the service on you of this Summons, if served within this County, or within thirty (30) days if served elsewhere.

This action is brought to determine the adverse claims to and the clouds upon the title to the real property described in the complaint herein and hereinafter described by the said plaintiff, a corporation, which claims that by itself, or by itself and its predecessors in interest, it has been in the actual, exclusive and adverse possession of such property continuously for twenty (20) year prior to the filing of the said complaint, claiming to own the same in fee against the whole world, and to have paid all taxes of every kind levied or assessed against said property during the period of five (5) years continuously next preceding the filing of said complaint, and which said property is situated in the said County of Nevada, State of California, and bounded and described as follows, to-wit:

All that real property situated, lying and being in the city of Nevada City, county of Nevada, state of California, particularly described as follows:

All of Lot 5 and the west 20.75 feet of Lot 8 in Block 16, Nevada City, California, as shown on the Official map of Nevada City, made by H. S. Bradley in 1869.

Beginning at a point on the south side of Broad Street from which the corner of Broad and Pine Streets bears N. 72 deg. 26 min. W. 120.57 feet, and running thence:

1. S. 72 deg. 26 min. E. 20.66 feet. Thence
2. S. 17 deg. 06 min. W. 173.00 feet to Spring Street. Thence along Spring Street
3. N. 72 deg. 26 min. W. 20.75 feet to the east line of Lot 4. Thence
4. N. 17 deg. 08 min. E. 173.00 feet to the place of beginning and containing 0.0825 acres, more or less.

AND YOU ARE HEREBY NOTIFIED that unless you appear and answer as above required, the said plaintiff, a corporation, will take judgment for any money or damages demanded in said complaint, as arising upon contract, or will apply to the court for any other relief demanded in the complaint.

GIVEN UNDER MY HAND and the seal of the Superior Court for the County of Nevada, State of California, this 27th day of June, 1932.

LOCAL HAPPENINGS

W. H. Wayman, of Pike City was a visitor in this city last Friday.

H. A. Curnow, employee in the local Bank of America, will drive to Eureaka early this week.

Miss Irene Browning was a visitor in this city from French Corral over Saturday and Sunday.

After a three day visit in Oakland, Mrs. H. B. Wright and son Billy returned yesterday afternoon to this city.

Miss Erla Davidson, of San Francisco, spent last week end in Nevada City with her parents ,Mr. and Mrs. Loui Davidson.

Mrs. Knight, mother of Mrs. Lamaar Fleming, returned home last Saturday from several days visit in the bay region. She says home looks good to her.

W. H. Hustler, of Columbia Hill, was a recent Nevada City visitor.

John J. Connell of Alleghany was a business visitor in this city Saturday.

Henry Toccalini, high school football player, who was injured in the San Juan game two weeks ago, is well on the road to recovery and will return to his classes in the very near future.

Two huge trucks and trailers loaded with silver fir Christmas trees passed through Nevada City bound south yesterday. Cutting Christmas trees in August must mean that there is still plenty of demand for them despite the depression.

Although Frank Chidotti may not be such a hot shot as a deer hunter, it seems that he is some punkin as an angler. Yesterday, with Mrs. Chidotti and Elmer Fisher, Chidotti drove over near Emmigrant Gap and tried fly fishing in Spaulding Flume. Much to his surprise, as soon as he made one cast, some poor fish grabbed his little fly. Frank had a good day, bringing home three lake trout averaging 18 inches long each.

Rumored around town today is the story that Louis Riley rode home from Sacramento early this morning on the tail-gate of a produce truck. Of course far be it from us to say a man was hanging on the gate "too long, but Clyde Mugford, with whom Riley went to Sacramento with, says that while he was buying automobiles, Riley went to call on Miss Sacramento or something. When the time came to go home, Riley was A. W. O. L. and after waiting half the night, Mugford came on home alone. Draw your own conclusions.

Mr. and Mrs. Milo Davidovich who are visiting relatives in Grass Valley, spent Saturday night and Sunday in Nevada City as the guests of Mr. and Mrs. Ross R. Anderson. Mr. Davidovich, a mining engineer from Tonopah, Nevada, is looking over the mining situation in Nevada County with an eye to locating here permanently. The Davidovichs [illegible] people of very high standing [illegible] is hoped that they are succe[illegible] making a permanent locati[illegible]

Mr. John Rodda of Oakla[illegible] his brother Bill Rodda from M[illegible] apolis, will visit Nevada City [illegible] week end. John Rodda is forem[illegible] of the Byron Jakcson Pump Company in Oakland, while his brother is the Bill Rodda of baseball fame. Both men were former residents of Nevada City and Grass Valley.

Henry Katterhorn ,of Sacramento passed through Nevada City Sunday with two large truck loads of Silver Fir Christmas trees that were being taken to Sacramento for the holiday season. Mr. Katterhorn with a crew of men have been hauling trees from the Ruby mine property to North San Juan for the past few weeks. He purchased the trees from the Ruby mine Company.

Mr. Earl E. Bachman, Assistant Forest Supervisor of Tahoe National Forest, left Saturday for San Francisco where he has made reservations on a specially chartered plane for Chicago, Illinois. From there he will entrain for Niles, Michigan, where he will spend the next two weeks with his parents. While in the East he will attend the Homecoming celebration of his Alma Mater. He is looking forward to watching Michigan State play football as they are one of the leading contenders in eastern gridiron sports. Mr. Bachman is the third member of the local office to tour the East this fall, Mr. Gracey and Mr. McCain preceding him. Mr. Bachman did his duty as a public citizen and voted an absent ballot beofre leaving.

1932 HIGH SCHOOL BOOK GETS VERY HIGH RATING

Last year's Nevada City high school annual the "Quill," received a very high rating by both Armstrong's Business College of Berkeley and the National Scholastic Press Association.

The 1932 year book was given a rating of 81 points out of a possible 100 points by the Armstrong school. In the Sacramento Bee it was noticed that by the same rating method. Roseville high school was given a grade of 84. In the Grass Valley Union an article was published which said that Armstrong's Business College gave the Grass Valley high school a rating of 67 on their last year's annual.

The 91 rating given the local high school ranks the annual amoung the best in the state.

Nevada City high school is a member of the National Schoolastic Press Association. In the rating given by that body, the local high school was given a score of 754 out of a possible 1000 points. That gives them a classification of "first class journal." The best rating possible is termed "All American." In all there are six different ratings.

In preparing for the annual classifications, the National Schoolastic Press Association take these points into consideration: Physical make-up, which includes inspection of cover, binding, page spacing and print. Organization of material. Photography, Finance, Art Work. How well the theme is carried out. School life. The "Quill" was given an extra 50 points for it successful financing.

The resume pertaining to last year's "Quill" by both judging organizations indicated that the book was a superior annual from every standpoint.

Last year the editorial staff included Betty Bettles ,editor, Ruth Rector; assistant editor, and Edgar Davey; Business manager, Miss Stephens was literary advisor, Miss Fischer was art advisor and Mr. Kjorlie was the financial advisor.

Mr. and Mrs. J. J. Jackson and Mr. and Mrs. Charles Elliott attended the St. Marys and Santa Clara football game last Saturday. Mr. Jackson is a graduate of the Santa Clara college.

STORY OF THIS DISTRICT IN SAT. EVE. POST

Under the heading "The Argonauts of '32," an article appeared in the Saturday Evening Post of October 15, 1932, that told something about the gold rush in the Mother Lode district.

Although the story was based about the recent strike of high grade ore made by Bob Newmeyer on his claim on Jackass Hill, fully half of the article deals with the work of the snipers, prospectors and miners working on their own hook in the Nevada City mining district.

Three pictures shown with the article were taken in this vicinity. One shows a group of miners working long toms along the South Fork of the Yuba river near Smartsville. Another shows Mr. and Mrs. P. Thompson panning out some gravel gold on Deer Creek near Grass Valley. Under this picture it is stated that they are making from three to three and one half dollars per day. Which, if true, we would say is mighty good for working the river!

Still another picture shows a man on the Yuba river near Nevada iCty screening out the rocks form some gravel and sand before wheeling the pay dirt down to the river where he can wash it.

There have been other stories like this one published about this country in other national magazines. If they were read and treated as stories it would be alright. The trouble is that a lot of the readers get the impression that all a person has to do is to go to Nevada County, work a few hours a day and live on the fat of the land. Nothing could be farther from the truth!

People have heard about this gold country until there are now perhaps some 25,000 prospectors working the hills and streams around here. The average earnings for these people is less than 25 cents per day. The life that they are forced to live is of the hardest. Living conditions will be extremely bad for those people this winter especially. Many of them will be forced to live on charity and there is too much of that in this country already.

This winter the rivers will be so swollen that it will be impossible to work along the banks. That is where most of the prospectors work. Where are they going? They have got to live.

True, the big mines around here are working full blast and they use a lot of men. But have you ever tried to get on? If you haven't got a pull, your chances are not very good. The big mines employ a pretty steady group of miners. It is not often that they make a change.

Our advice to men in other parts of the country that are broke and out of work and are considering taking a fling at working the river is—FORGET IT.

THE FOOL
By Clarence McKenzie

A man is a fool, who will ridicule—
Every effort his neighbors make.
And do nothing himself, but sit on the shelf—
Outside of the foolkiller's wake.
By saying things tart, he thinks he is smart—
And so he tries to show it.
But a man of good sense can sit on the fence,
And see he's a fool and don't know it.
It comes to my mind that a man of this kind,
Was only born—for surely—
God did not make him.
And that is why as much as he may try
The fool-killer will not take him.
